Dear Hiring Manager,

I am excited to apply for the **Automation Tester** position at **Tata Consultancy Services**. With a strong background in **automation testing and quality assurance**, I have extensive experience in **test planning, execution, and automation** across Agile environments. My expertise in ensuring **quality gates at different testing levels, managing test execution, and supporting release activities** aligns well with the responsibilities of this role.

Currently working as an **Automation Test Lead**, I have been responsible for **designing and executing automated test scripts, performing functional and regression testing, and contributing to test automation frameworks**. My experience with **Selenium, Java, API testing, and test management tools** has helped optimize software testing processes and improve efficiency. Additionally, I have worked on **collaborating with cross-functional teams, defining test strategies, and supporting the deployment of high-quality software releases**.

I am particularly interested in this role as it emphasizes **release coordination, test automation strategies, and risk-based testing approaches**, areas where I can contribute significantly. My ability to **work in Agile teams, manage test environments, and ensure smooth test execution** makes me a strong candidate for this position.

I would welcome the opportunity to discuss how my skills and experience can support your team's goals. Thank you for your time and consideration. I look forward to hearing from you.

Best regards,

Muthu Kamatchi Manickam
